Mason on the Move

By: Kyra Wiggin

At Mason Elementary School Mr. Parent, our P.E teacher, and Mrs. Coey, the 2nd grade teacher, run a program called Mason on the Move. On every Thursday of every month we play an active sport after school. The program runs from 3:30 to 4:40. The kids that play are in grades 3, 4, and 5. Most of the time the kids will do drills for the game and then play an actual game. Other times the kids will get right to playing a game. Every month we will play a different game. For example in the month of February we are doing soccer and for the month of March we will be doing physical fitness competitions. In Mason on the Move the kids don't get into real competitions, it's all for fun. The kids don't always play in the gym. They have been seen playing in the field and in the parking lot across from the school. Mason on the Move gets kids to stay active.

Pizza Hut Fundraiser

By: Ernie Sullivan

The Pizza Hut Fundraiser is where the Mason Elementary School students and parents have fun while stuffing themselves with delicious pizza. This "hut" is in Merrimack, NH. There is thin and thick crust pizza. Also there's an all you can eat buffet. You can even create your own pizza meal. The pizza there is way better than usual pizza, in my opinion, but you may think differently. The fundraiser can actually host schools and even a whole group of kids. This fundraiser brings in money to be used towards things for the students and staff members of Mason Elementary. We would like to thank the school club for putting on this great event.

Wax Museum

By: Auburn Rafferty

This year on February 19, 2016, the third grade class hosted a Wax Museum. During this every third grader dressed up as a historic person of their choice. The students researched that person of choice. Some of the chosen people were Milton Hershey, famous presidents like Abraham Lincoln, and the well known Steve Irwin. The students must also piece together a costume to wear. On the day of the Wax Museum the students stand or sit in a position that the historic person would be sitting or standing. When the students are ready a class will come in and look at everyone. If you look into the hallway coming up to the gymnasium, you will see life-sized drawings of the people being presented.. You will also find an I Pad and a tag on the drawings, you use the I Pad to scan the drawing and a video will come up. When you press play it tells about that person and why they're famous in their own words. If you are a parent that went to this amazing day you know how much hard work goes into this.
